Selecting the correct size shirt.

Take a polo shirt from your wardrobe that is the desired fit and lay it out flat as per image above and right. Face up or face down does not matter. You need to measure the width of the shirt across the chest area. This is done from where the seam of the arm meets the side seam under the arm. BEFORE measuring hold these two points and stretch the shirt a little (3 or 4 cms) and then let go. The shirt will spring back and this will give you an accurate measurement.

Select your shirt size from the table above.
